

EDGY MODS

Denali, Tahoe, Suburban & Yukon Lowering Instructions

Before you begin the install disable the Auto Entry / Exit feature then make sure the power is off. After lowering and you try the lowest setting, Entry Mode, the vehicle will drop and then shoot back up. To make it stay low move just a little bit, around 5mph and then press the button. To obtain a 2" drop make the front Links 165mm long overall and the rears 105mm.

Front:

1. Jack up each corner and locate the stock ride height sensor Links. They're straight inside the wheel well right above the tire. You can do the rear at the same time.
2. To remove the factory Link pop off the Control Arm side first using a flat head screwdriver.
To do the sensor side you must push out the little Pin and then slide it off the ball stud.
3. **Lengthening the Link from the factory length will lower the vehicle.** Each 5mm longer than stock will lower approx. $\frac{3}{4}$ - 1 inch. Set the new Adjustable Links so they are equal in length.
4. Install Adjustable Links with the long end up. Blue end to the Control Arm, Black end to the sensor.

Rear:

1. The rear Links are located right in front of the rear tires.
2. Remove the same way as the front. Control Arm side first and then be sure to remove the pin.
3. **Shortening the Link from the factory length will lower the vehicle.** Each 5mm shorter than stock will lower approx. $\frac{3}{4}$ - 1 inch. Set the new Adjustable Links to equal lengths.
4. Install with long end up. Black end to sensor, Blue to the Control Arm

Start the vehicle, raise it up and down and move it forward and back to get the suspension active to the new settings. If you are not happy with the height you can easily re-adjust each Link. Just remove 1 side and give it a few turns. Usually, 3 turns is about a $\frac{1}{4}$ inch in height.

Depending how low you make the vehicle a wheel alignment may be required to reduce tire wear.

Please share images of your vehicle. Email or text them to us for the gallery.

Thank you for the purchase. If you have any questions, please don't hesitate to ask any time via phone or Email.
